

****Abhishek Dhamshetty****

07569696610 | abhishekdamshetty@gmail.com | [LinkedIn Profile URL - Optional] | [GitHub Profile URL - Optional]

****Summary****

Proficient in C and C++. Eager to contribute my programming skills to a challenging and growth-oriented role.

****Skills****

* C

* C++

* [Add any other relevant skills - e.g., Data Structures, Algorithms, Operating Systems, Debugging, Version Control (Git), Software Development Methodologies (Agile/Scrum), Specific Libraries/Frameworks used]

****Education****

[While your provided details say N/A, if you have *any* education details, even high school, it's generally beneficial to include them. If you're a self-taught programmer, you can mention relevant online courses or certifications here.]

* *Example (if applicable):** High School Diploma, [School Name], [City, State], [Year of Graduation]

* *Example (if applicable):** Relevant Online Courses/Certifications (e.g., Udemy, Coursera) - [List specific courses]

****Experience****

[Although you've marked experience as undefined and N/A, consider adding any relevant project work, volunteer experience, internships, or even personal projects that demonstrate your skills. Even if it's not formal employment, it provides valuable context.]

* **Example (for a personal project):** **Project Title** (Personal Project),
[Dates of Project]

- * Briefly describe the project and your role. Highlight your use of C/C++.
- * Quantify your achievements where possible (e.g., "Improved performance by 15%").

Projects (Optional, but highly recommended, especially if "Experience" is limited)

* [Project Name 1]: [Brief description of project. Highlight C/C++ usage and key achievements.]

* [Project Name 2]: [Brief description of project. Highlight C/C++ usage and key achievements.]

Awards and Recognition (Optional)

[List any relevant awards, scholarships, or recognition you've received.]

Important Considerations:

* **Tailor your resume:** Customize this template for each job application. Highlight the skills and experiences most relevant to the specific role.

* **Quantify your achievements:** Whenever possible, use numbers or metrics to demonstrate the impact of your work.

* **Use action verbs:** Start your bullet points with strong action verbs (e.g., Developed, Implemented, Designed, Optimized).

* **Proofread carefully:** Ensure your resume is free of typos and grammatical errors.

* **Consider a portfolio:** If you have any coding projects you can showcase, create a portfolio website or GitHub repository to demonstrate your skills.

This improved structure gives you a starting point. Fill in the bracketed placeholders with your specific information. Even if some sections are initially sparse, the structure provides a professional framework. As you

gain more experience and skills, you can expand these sections.
